

MAKE 2 SALES INSTEAD OF 1 SALE!

*Sell a Sta-Slim
Triceps Bomber
to every customer
who buys an
E-Z Curl Bar*

Every customer who buys a Sta-Slim E-Z Curl Bar also needs a Sta-Slim Triceps Bomber... and here's why...

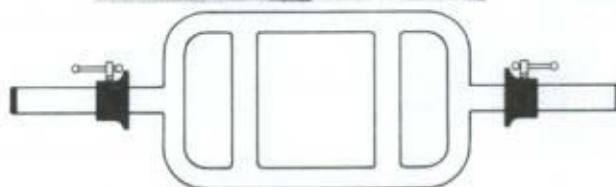

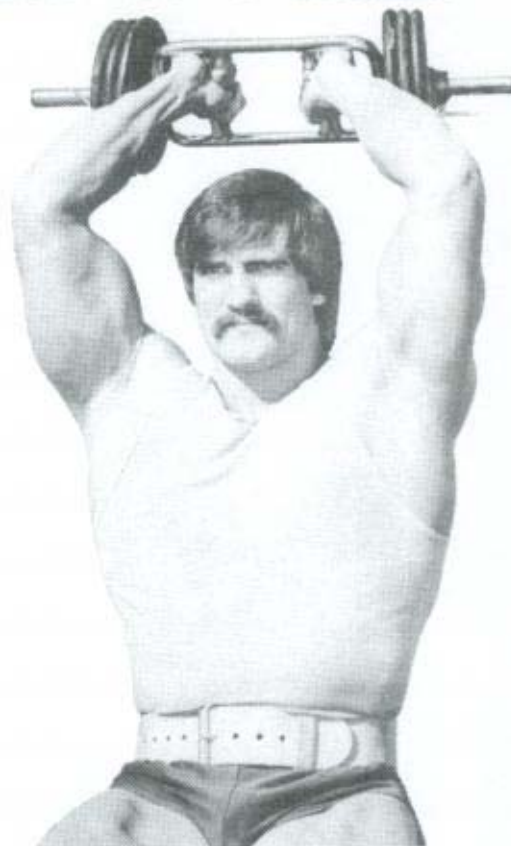

2/3 of an arm's measurement is determined by the size of the triceps muscle. People who want *really big arms* in the fastest possible time must work both their biceps and their triceps *heavily*.

Today's advanced big arm training methods require the least amount of rest between sets for best results. Many of today's champions go directly from bicep exercises to tricep exercises... *without any rest whatsoever!*

In order for your customer to do this type of workout, he needs *both* an E-Z Curl Bar and a Triceps Bomber... loaded with the correct weights. Then, he can work back and forth from biceps to triceps... without resting.

This is why you should sell *both* an E-Z Curl Bar and a Triceps Bomber to every customer. Customers who already have an E-Z Curl Bar should also have a Triceps Bomber.

Make sure you cash in on this great opportunity for a combination sale each and every time. If you need help in converting single sales into combination sales, just phone our International Sales Manager, Tom Lincir. He'll show you how to do it... so you can make a lot of extra money!

Case pack: 6. Case weight: 25 lb.

The Sta-Slim Triceps Bomber works triceps muscles to the maximum... with minimum strain on wrist and elbow joints. And, it's an *absolutely beautiful* product you'll be proud to display and sell in your store... made from rugged .083 tubing, electrically welded, then chrome plated. Comes complete with collars and wrenchless screws.

Do your customer a favor and do yourself a favor every time you sell a Sta-Slim E-Z Curl Bar. Sell your customer a Sta-Slim Triceps Bomber, too! And, don't be caught short without enough Triceps Bombers to meet the demand. Send in or phone in your order TODAY!
